**Section 1 - IDENTIFICATION**

Material Name: Coal Slag

Trade Name: Black Magnum™, Black Diamond

Recommended Use: Abrasives, Roofing Granules and other aggregate uses.

Restrictions on Use: None known.

Manufacturer Information
US Minerals, Inc.
18635 West Creek Drive
Tinley Park, IL 60477
Phone: (708) 623-1935
Fax: 219-864-4675
Emergency # (800) 803-2803; (800) 424-9300 (ChemTrec)

**Section 2 - HAZARDS IDENTIFICATION**

OSHA (29 CFR 1910.1200) Classification of Coal Slag (CAS # 68476-96-0):

<table>

Precautionary Statements

Prevention | Response | Disposal
--- | --- | ---
Do not breathe dusts. | Get medical advice/attention if you feel unwell. | Dispose of contents in accordance with federal, state/provincial and local regulations

Hazards not Otherwise Classified: None Known.

Unknown Acute Toxicity Statement (Mixture): None Known.

**Section 4 - FIRST AID MEASURES**

**Description of Necessary Measures**

**Inhalation**
- Remove to fresh air. Get medical attention if you feel unwell.

**Skin**
- Product is not a skin sensitizer. Wash skin thoroughly with water and soap. Remove contaminated clothing. Get medical attention/attention if symptoms occur.

**Eyes:**
- Immediately flush eyes with water for at least several minutes. Remove contact lenses, if present and easy to do. Do not rub eyes. Continue rinsing. If irritation persists, get medical attention.

**Ingestion**
- If a large amount is swallowed, rinse out mouth. Give water to drink. Do not induce vomiting. Get medical attention if symptoms occur.

**Most Important Symptoms/Effects, Acute and Delayed (Chronic)**

**Acute Effects**
- **Inhalation:** Excessive exposure to high concentrations of dust may cause irritation to the mucous membranes of the upper respiratory tract.
- **Eye:** Excessive exposure to high concentrations of dust may cause irritation to the eyes.
- **Skin:** Skin contact with dusts may cause irritation or dermatitis.
- **Ingestion:** Ingestion of dust may cause nausea and/or vomiting.

**Chronic Effects**
- Prolonged and repeated inhalation exposure to excessive concentrations of dusts may cause pulmonary fibrosis.

**Immediate Medical Attention and Special Treatment:** Treat symptomatically.

**Section 5 - FIRE FIGHTING MEASURES**

**Suitable (and Unsuitable) Extinguishing Media**
- Use extinguishing agents appropriate for surrounding fire.

**Specific Hazards Arising from the Chemical**
- Not applicable for solid product.

**Hazardous Combustion Products**
- None known

**Special Protective Equipment and Precautions for Firefighters**
- Wear full protective firefighting gear including self-contained breathing apparatus (SCBA) for protection against possible exposure to fumes and/or smoke from the fire. Do not release runoff from fire control methods to sewers or waterways.

**Section 6 - ACCIDENTAL RELEASE MEASURES**

**Personal Precautions, Protective Equipment and Emergency Procedures**
- For spills involving finely divided particles, clean-up personnel should be protected against contact with eyes and skin. If material is in a dry state, avoid inhalation of dust. Fine, dry material should be removed by vacuuming or wet sweeping methods to prevent spreading of dust. Avoid use of compressed air to air sweep surfaces. Do not release into sewers or waterways.

**Methods and Materials for Containment and Cleaning Up**
- Collect spilled material in appropriate, labeled container for recovery or disposal in accordance with federal, state/provincial, and local regulations.
**Section 7 - HANDLING AND STORAGE**

**Precautions for Safe Handling**
Do not breathe dust. Wear protective gloves / protective clothing / eye protection, as applicable. Emergency safety shower and eye wash stations should be present.

**Conditions for Safe Storage, including any Incompatibilities**
Store away from incompatibles such as strong acids and bases.

**Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION**

**Component Exposure Limits**

**Appropriate Engineering Controls**
Local exhaust ventilation should be used to control the emissions of air contaminants below recommended exposure limits. General dilution ventilation may assist with the reduction of air contaminant concentrations. Emergency eye wash stations and deluge safety showers should be available in the work area.

**Individual Protection Measures:**
**Respiratory Protection:**
Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, use only a NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. Concentration in air of the various contaminants determines the extent of respiratory protection needed.

Half-face, negative-pressure, air-purifying respirator equipped with P100 filter is acceptable for concentrations up to 10 times the exposure limit. Full-face, negative-pressure, air-purifying respirator equipped with P100 filter is acceptable for concentrations up to 50 times the exposure limit. Protection by air-purifying negative-pressure and powered air respirators is limited. Use a positive-pressure-demand, full-face, supplied air respirator or self-contained breathing apparatus (SCBA) for concentrations above 50 times the exposure limit. If exposure is above the IDLH (immediately dangerous to life or health) for any of the constituents, or there is a possibility of an uncontrolled release or exposure levels are unknown, then use a positive-demand, full-face, supplied air respirator with escape bottle or SCBA.

**Warning!** Air-purifying respirators both negative-pressure, and powered-air do not protect workers in oxygen-deficient atmospheres.
Eyes:
Wear eye protection/face protection. Chemical goggles, face shields or glasses should be worn to prevent eye contact. Contact lenses should not be worn where particulate exposure to this material is likely.

Skin:
Persons handling this product should wear appropriate clothing to prevent skin contact. Take off contaminated clothing and wash before reuse. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves.

**Section 10 - STABILITY AND REACTIVITY**

Reactivity
No reactivity hazard is expected.

Chemical Stability
Coal slag is stable at normal temperature and pressure.

Possibility of Hazardous Reactions
None Known.

Conditions to Avoid
None known.

Incompatible Materials
Strong acids or bases

Hazardous Decomposition Products
None known.

**Section 11 - TOXICOLOGICAL INFORMATION**

Acute Toxicity Values:

No Skin (Dermal) Irritation data has been determined for Coal Slag as a mixture. The following is available for components:
Calcium Oxide and Iron Oxide: Moderately irritating.

No Eye Irritation data has been determined for Coal Slag as a mixture or its individual components.
Safety Data Sheet

Material Name: Coal Slag

No Skin (Dermal)/Respiratory Sensitization data has been determined for Coal Slag as a mixture or its individual components.

No Aspiration Hazard data has been determined for Coal Slag as a mixture or its individual components.

No Germ Cell Mutagenicity data has been determined for Coal Slag as a mixture or its individual components.

Carcinogenicity: Coal Slag is not listed as a carcinogen by IARC, NTP, NIOSH, and OSHA. The following information was identified for the components:
   - Iron Oxide: ACGIH A4 – Not Classifiable as a Human Carcinogen.
   - Beryllium: NTP and IARC – Known to be a Human Carcinogen.
   - Crystalline Silica: NTP and IARC – Known to be a Human Carcinogen.

No Toxic Reproductive data has been determined for Coal Slag as a mixture or its individual components.

No Specific Target Organ Toxicity (STOT) following Single Exposure data has been determined for Coal Slag as a mixture. The following information was identified for the components:
   - Calcium Oxide: Can cause respiratory tract irritation, skin and eye irritation.

Specific Target Organ Toxicity (STOT) following Prolonged or Repeated Exposure data has been determined for Coal Slag as a mixture and for its individual components. The following information was identified for the components:
   - Coal Slag: Repeated or prolonged inhalation exposure to excessive concentrations of coal slag can cause lung fibrosis.
   - Iron Oxide: Repeated or prolonged inhalation exposure of excessive concentrations of iron oxide dust can cause a benign lung disease, called Siderosis.

***Section 12 - ECOLOGICAL INFORMATION***

Ecotoxicity (aquatic and terrestrial)
   Coal slag is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and Degradability
   No data available for coal slag.

Bioaccumulative Potential
   No data available for coal slag.

Mobility
   No data available for coal slag.

***Section 13 - DISPOSAL CONSIDERATIONS***

Disposal Methods
   Dispose in accordance with all applicable regulations. Observe safe handling procedures.

***Section 14 - TRANSPORT INFORMATION***

Coal Slag does not have a Transport Dangerous Goods (TDG) classification.

U.S. Department of Transportation, DOT (49 CFR 172.101):
   Shipping Name: Coal Slag is Not Regulated.

International Maritime Dangerous Goods (IMDG):
   Shipping Name: Coal Slag is Not Regulated.
**Section 15 - REGULATORY INFORMATION**

Component Analysis

U.S. Federal Regulations

Coal Slag contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 311/312 (40 CFR 370.21), SARA Section 313 (40 CFR 372.65), CERCLA (40 CFR 302.4), and TSCA 12(b).
